During the 90s Le Tone had a major hit, "Joli Dragon", and devoted himself to music for 15 years before progressively moving towards illustrative art. Since 2011 his creations have been exhibited in famous places such as the Pompidou centre. An admirer of artists who know how to make the best use of colour, Le Tone confesses to having a weakness for black and white, which he uses to tell simple stories by using felt pen drawings in notebooks.

1974

Citroën launches CX. It's the ultimate mix of technical innovation and advanced design with the engine and gearbox positioned together at the front. Sophisticated hydropneumatic suspension, concave rear screen and a futuristic dashboard help it to succeed amongst more ordinary rivals.

2016

Experience Concept reinvents the prestige saloon. A bold, fresh silhouette, a high-end stylish interior and the latest technology combine to inspire the world of automotive design.

CITROËN Origins

Discover the models that make up Citroën's extraordinary history, from 1919 to the present day.

1934

Citroën revolutionises the automotive landscape with Traction Avant. The famous name relates to its ground breaking front wheel drive engineering.

1939

Citroën launches 'TUB', a supremely practical modern design with a sliding side door: its successor is the famous Type H, above, launched in 1948.

1948

The much-loved 2 CV is created as a "safe and economical vehicle, able to carry 4 people on-board and 50 kg of luggage". More than 5 million are made.

1955

Unveiled to a stunned public at the 1955 Paris Motor Show, DS takes futuristic design to new heights. Its stunning aerodynamic shape, created by Flaminio Bertone, earns it the nickname 'flying saucer'. Under the skin it's just as advanced.

1968

It's a golden age for light and agile vehicles like Ami 6, Dyane and Mehari, a unique design for all roads and multi-purpose use.

2017

Winners of the Manufacturers' Rally Raid World Cup from 1993 to 1997; Rally Raid World Cup Drivers' Champion five times in a row; eight Manufacturers' Champion titles in WRC plus three in WTCC... Citroën has continued to demonstrate exceptional sports pedigree upon returning to WRC in 2017.

15 SAFETY AND DRIVING AIDS

SPEED LIMIT RECOGNITION SYSTEM

This technology recognises and conveys speed limits as you drive, displaying them clearly in the instrument cluster. All recorded limits can then easily be set in the cruise control or speed limiter.

DRIVER ATTENTION ALERT

This ingenious driving aid assesses driver attention level by monitoring changes in vehicle distance from road markings. This function is particularly suitable for roads over 40mph.

360° PARK ASSIST

A prime example of technology making life easier, 360° Park Assist uses four cameras discreetly positioned around the car to make every manoeuvre stress free. You can choose the 360-degree view that gives you a bird's eye picture of any hidden obstacle around you, rear view for accurate reversing, or front panoramic views for both the left and right sides. When it comes to narrow gaps and tricky moves, nothing stands in your way.

AUTO INTELLIGENT BEAM HEADLIGHTS

A great safety feature, your lights switch from main beam to dipped automatically when oncoming traffic is detected.

CORNERING FUNCTION

This extra light beam increases visibility and safety around tight bends and at junctions.

PARK ASSIST

All you need to do is find a parking space, then let Park Assist do the rest. It automatically manoeuvres the car perfectly into place while you simply look after acceleration and braking.

ACTIVE BLIND SPOT MONITORING SYSTEM

This system gives you an instant visual warning if there's a vehicle in your side mirror's blind spot, and it's active from 10mph. If a driver doesn't react to the flashing warning and moves into the path of a hidden vehicle, Active Blind Spot Monitoring guides the steering back in the direction of safety.

⊘ CAN BE DEACTIVATED

DRIVER ATTENTION ALERT SYSTEM

An advanced safety feature, Driver Attention Alert System can sense if a driver is becoming drowsy and send clear visual and audible signals – it knows when you need a break.

⊘ CAN BE DEACTIVATED

ACTIVE SAFETY BRAKE

Here's a reassuring emergency system that helps you to avoid low speed collisions. It detects obstacles such as vehicles that have stopped in front of you and provides a warning of possible impact. If the driver fails to react, the system will apply the brakes automatically.

⊘ CAN BE DEACTIVATED

EMERGENCY COLLISION ALERT SYSTEM

Using a front mounted sensor, the Emergency Collision Alert System alerts you to the risk of a collision and operates from 20mph.

COFFEE BREAK ALERT

This system reminds the driver to take a break on long journeys, for example after 2 hours at average speeds over 40mph.

HILL START ASSIST

Hill Start Assist holds the car for 2 seconds when you pull away on steep inclines of over 3%, allowing you to make safe, smooth progress.

REVERSING CAMERA

The moment you engage reverse gear, this system brings you a clear picture of what's going on behind you, complete with visual guides to assist accurate placement. The reversing camera uses the 12 inch panoramic HD screen where this is fitted, or the 7 inch touchscreen interface.

AUTOMATIC ELECTRONIC PARKING BRAKE

This system automatically applies the parking brake when the engine is switched off and releases when you move off. It is also possible to apply and release manually.

ADAPTIVE CRUISE CONTROL

Using its sensor, Adaptive Cruise Control detects the vehicle in front and automatically maintains a safe distance, selected by the driver in advance. The system will bring the car to a stop if necessary.

CLASS LEADING ENGINES

Citroën Grand C4 SpaceTourer features a range of diesel and petrol engines that simply don't compromise. Strong, flexible performers, they produce benchmark CO₂ emissions and achieve favourable fuel consumption figures. There are two refined and advanced petrol engines, the PureTech 130, plus two diesel options, the BlueHDi 130 and 160. Each one is equipped with Stop & Start technology to minimise consumption and emissions.

2015, 2016, 2017 and 2018 International Engine of the Year Award for the PureTech 110 and 130 S&S, in the 1 l to 1.4 l engines category, awarded by the jury of The International Engine of the Year Awards organised by the British magazine Engine Technology International.

* Figures shown are for comparison purposes only; you should only compare these fuel consumption and CO₂ figures with other cars tested using the same technical standard. The fuel consumption you achieve, and CO₂ produced, in real world conditions will depend upon a number of factors: including the accessories fitted (post registration), variations in weather, driving styles and vehicle load. There is a new test WLTP (Worldwide Harmonised Light Vehicles Test Procedure) used to measure fuel consumption and CO₂ figures. The CO₂ figures shown are NEDCeq (New European Driving Cycle Equivalent), calculated using an EC correlation tool which converts WLTP figures to NEDC. These NEDCeq figures are based on the outgoing test cycle and will be used to calculate tax for the first registration. CO₂ and fuel economy figures may vary according to wheel fitment and optional extras fitted.
