CO<sub>2</sub> figures and OTR pricing shown above are for a standard vehicle without any additional optional equipment. CO<sub>2</sub> and fuel economy figures and OTR pricing may vary according to wheel fitment and optional extras fitted.

The fuel consumption you achieve, and CO<sub>2</sub> produced, in real world conditions will depend upon a number of factors including the accessories fitted (post registration), variations in weather, driving styles and vehicle load. There is a new test (WLTP\*) used to measure fuel consumption and CO<sub>2</sub> figures. The CO<sub>2</sub> figures shown are NEDC equivalent, calculated using an EC correlation tool which converts WLTP figures to NEDC figures, however, these NEDCeq figures are based on the outgoing test cycle (NEDC\*\*) and will be used to calculate tax for first registration. CO<sub>2</sub> and fuel economy figures may vary according to wheel fitment and optional extras fitted.

Figures shown are for comparability purposes; you should only compare fuel consumption and CO<sub>2</sub> figures with other vehicles tested using the same technical standard.

\*WLTP - Worldwide harmonised Light vehicles Test Procedure. \*\*NEDCeq - New European Driving Cycle.

All information and prices correct at time of publication, but are subject to change at any time without prior notice (which may occur as a result of matters including, but not limited to, any changes in legislation and/or any changes by the government).

### 7" Capacitive Colour touchscreen

#### 7" Capacitive Colour touchscreen:

The PEUGEOT 108 brings the city car into a new era with its 7" Capacitive colour touchscreen placed prominently in the middle of the dashboard.

This 7" screen establishes a new relationship between the driver and the car. It is the interface for the audio system, the trip computer and for vehicle settings. It also doubles as the reversing camera screen for added safety during manoeuvres.

It allows you to stay connected even when you are on the move. touchscreen connectivity is available via USB, Bluetooth® and Mirror Screen®.

### Mirror Screen®

#### Mirror Screen®:

Allows the mirroring of a compatible smartphone screen to access the key functionality on the handset. Once paired functions are displayed on the 7.0" capacitive colour touchscreen. System features vary by provider/phone and can include navigation, text display, text reading, media functionality voice control. Mirror Screen® uses the following systems:

- **Apple CarPlay™**
  - **Android Auto**
  - **MirrorLink®**
-

### Colour Reversing Camera

**Colour Reversing Camera:** (Standard from Allure and Collection)

Even in tight city spaces, parking is a doddle with the colour reversing camera in 108. It's triggered automatically when you shift into reverse, and an image of what's behind you is displayed on the screen, helping you to reverse safely in any situation.

### PEUGEOT Open and Go (keyless entry)

**PEUGEOT Open and Go:** (Standard on Allure)

No more fumbling for your keys or struggling to unlock the car in the dark. The PEUGEOT Open & Go system, available on the Allure level, provides keyless entry so you're always ready to go. PEUGEOT Open & Go in 5 easy steps:

- Just open the door of your 108
- Take a seat
- Depress the clutch
- Press the start button
- And you're off.

### Active City Brake

**Active City Brake (Optional on Allure and Collection)**

Active City Brake is a technology which makes it possible to avoid an accident or reduce its severity if the driver fails to react. It works in urban conditions at speeds of less than 20 mph. A short range sensor is fitted to the top of the windscreen and can detect other vehicles that are driving in the same direction or stationary. This will automatically trigger an emergency brake to stop the vehicle and avoid a collision entirely or limit the consequences of an accident by reducing the speed of impact.

### Lane Departure Warning System

**Lane Departure Warning System:** (Optional on Allure and Collection)

The Lane Departure Warning System uses lane marker recognition to detect the white lines on well-maintained roads. It operates at speeds of more than 30 mph and urges the driver to avoid lane departure via an audible signal and warning light.

**PEUGEOT 108 Range: Exterior dimensions**

**PEUGEOT 108 Range: Interior dimensions**

The fuel consumption you achieve, and CO2 produced, in real world conditions will depend upon a number of factors: including the accessories fitted (post registration), variations in weather, driving styles and vehicle load. There is a new test (WLTP\*) used to measure fuel consumption correlation tool which converts WLTP figures to NEDC figures, however, these NEDCeq figures are based on the outgoing test cycle (NEDC\*\*) and will be used to calculate tax for first registration. Figures shown are for comparability purposes; you should only compare fuel consumption and CO2 figures with other vehicles tested using the same technical standard.

\*WLTP - Worldwide harmonized Light vehicles Test Procedure. \*\*NEDC - New European Driving Cycle.

^ 'LOW': Low speed city driving, representative of city centre driving, maximum 35mph.

^^ 'MEDIUM': Medium speed town driving, representative of town or suburban driving, maximum 50mph.

^^^ 'HIGH': High speed rural driving, representative of A-road or dual carriageway driving, maximum 60mph.

^^^ 'EXTRA HIGH': Extra High speed motorway driving, representative of a typical European motorway, maximum 81mph.

^^^ 'COMBINED': A mixed journey average of all elements

Figures quoted reflect a range of configurations (including non-UK market vehicles) and are subject to changes resulting from ongoing product development, range evolutions, testing and evaluations.
