PEUGEOT

Welcome to the world of PEUGEOT, a world of innovative French manufacturing tradition. Our journey started over 200 years ago with a steel foundry producing a diverse range of products from coffee grinders to saws. Our pursuit for innovation led to the production of our first motorised

vehicle in 1889, the Serpollet-Peugeot – a steam-powered three-wheeler. Our quest for perfection is what drives us, just as it did over 200 years ago. All of our expertise gained through the years has led to this point, introducing the striking PEUGEOT 308, over 200 years in the making.

Official Fuel Consumption in MPG (l/100km) and CO₂ emissions (g/km) for the PEUGEOT 308 range are:
Combined 36.9 (7.7) – 63.8 (4.4) and CO₂ 148 - 94 g/km.

The fuel consumption you achieve, and CO₂ produced, in real world conditions will depend upon a number of factors: including the accessories fitted (post registration), variations in weather, driving styles and vehicle load. There is a new test (WLTP*) used to measure fuel consumption and CO₂ figures. The fuel consumption figures shown in this brochure are calculated under the WLTP test. The CO₂ figures shown are NEDC equivalent (NEDCeq), calculated using EC correlation tool which converts WLTP figures to NEDC figures, however, these NEDCeq figures are based on the outgoing test cycle (NEDC**) and will be used to calculate tax for first registration. Figures shown are for comparability purposes; you should only compare fuel consumption and CO₂ figures with other vehicles tested using the same technical standard.

* WLTP - Worldwide harmonised Light vehicles Test Procedure. **NEDC - New European Driving Cycle. Information correct at time of going to print.
