† WLTP figures shown are for comparability purposes; only compare figures with vehicles tested to the same technical procedures. Actual real world driving results may vary depending on factors such as weather conditions, driving styles, vehicle load or any accessories fitted after registration. WLTP is a new test used for fuel consumption and CO₂ figures. Please visit renault.co.uk/configure for WLTP figures for any selected options. *All prices shown are the manufacturer's recommended retail prices. The "On The Road" price includes delivery to the dealer premises, number plates and a four-litre starter pack of AdBlue®, 12 months government road fund licence at £265 (or £165 for vans with a GVW of more than 3.5 tonnes) and the First Registration Fee of £55. Other goods or services supplied by agreement between the customer and the dealer are not included.

† WLTP figures shown are for comparability purposes; only compare figures with vehicles tested to the same technical procedures. Actual real world driving results may vary depending on factors such as weather conditions, driving styles, vehicle load or any accessories fitted after registration. WLTP is a new test used for fuel consumption and CO₂ figures. Please visit renault.co.uk/configure for WLTP figures for any selected options. ^A Payload equals the Maximum Operating Mass (Gross Vehicle Mass or GVW) less the Kerb Mass. Kerb Mass is the weight of the complete vehicle including coolant, oil, a 90% full fuel tank, a 100% full AdBlue tank, spare wheel and jack, but excluding driver and crew. All Kerb Masses, and therefore Payloads quoted are subject to a 5% manufacturing tolerance and are based on the base level model. Any additional equipment added (options or accessories), or the selection of a higher trim level, could result in a higher Kerb Mass and a reduced Payload, and may increase CO₂ and decrease MPG figures. *All prices shown are the manufacturer's recommended retail prices. The "On The Road" price includes delivery to the dealer premises, number plates and a four-litre starter pack of AdBlue®, 12 months government road fund licence at £265 (or £165 for vans with a GVW of more than 3.5 tonnes) and the First Registration Fee of £55. Other goods or services supplied by agreement between the customer and the dealer are not included.

Kerb Mass is the weight of the complete vehicle including coolant, oil, a 90% full fuel tank, a 100% full AdBlue tank, spare wheel and jack, but excluding driver and crew. All Kerb Masses, and therefore Payloads quoted are subject to a 5% manufacturing tolerance and are based on the base level model. Any additional equipment added (options or accessories), or the selection of a higher trim level, could result in a higher Kerb Mass and a reduced Payload, and may increase CO₂ and decrease MPG figures. † WLTP figures shown are for comparability purposes; only compare figures with vehicles tested to the same technical procedures. Actual real world driving results may vary depending on factors such as weather conditions, driving styles, vehicle load or any accessories fitted after registration. WLTP is a new test used for fuel consumption and CO₂ figures. Please visit reault.co.uk/configure for WLTP figures for any selected options.

*All prices shown are the manufacturer's recommended retail prices. The "On The Road" Price Includes delivery to the dealer premises, number plates and a four-litre AdBlue® starter kit, 12 months government road fund licence at £265 (or £165 for vans with a GVW of more than 3.5 tonnes) and First Registration Fee at £55. Other goods or services supplied by agreement between the customer and the Dealer are not included. No CO₂ or MPG data published for base Platform Cab as the final kerb weight of the vehicle is not defined until the body is fitted. **On the Road Price is less expensive than the total retail price due to the PiVG Government Grant. †Payload equals the Maximum Operating Mass (Gross Vehicle Mass or GVW) less the Kerb Mass. Kerb Mass is the weight of the complete vehicle including coolant, oil, a 90% full fuel tank, a 100% full AdBlue® tank, spare wheel and jack, but excluding driver and crew. All Kerb Masses, and therefore Payloads quoted are subject to a 5% manufacturing tolerance and are based on the base level model. Any additional equipment added (options or accessories), or the selection of a higher trim level, could result in a higher Kerb Mass and a reduced Payload, and may increase CO₂ and decrease MPG figures. † WLTP figures shown are for comparability purposes; only compare figures with vehicles tested to the same technical procedures. Actual real world driving results may vary depending on factors such as weather conditions, driving styles, vehicle load or any accessories fitted after registration. WLTP is a new test used for fuel consumption and CO₂ figures. Please visit renault.co.uk/configure for WLTP figures for any selected options.
