*When long-distance motorcycling
became a reality*

Honda's Gold Wing is one of the most iconic names in biking history. Revealed back in 1975, the Gold Wing became synonymous of long-distance motorcycling through the years. The world's longest motorcycle ride, spanning 10 years, 279 countries and a total distance of 457,000 miles (735,000 km) was achieved by an Argentinian rider on a 1980 Honda Gold Wing GL1100.

Source: Scotto, Emilio (2007), The Longest Ride: My Ten-Year 500,000 Mile Motorcycle Journey, MotorBooks/MBI Publishing Company, ISBN 9780760326329

In the beginning, the Gold Wing was powered by a 999cc liquid-cooled, flat-four engine.

What's not to love with the V4?

The love story between Honda and the V4 4-Stroke DOHC engines started more than 40 years ago. Designed to challenge the 2 strokes dominating the Road Racing World Championship, the NR500 started the lineage of Honda bikes sharing the DNA rooted in the VFR800F: the unique flexibility, smoothness and purity of output provided by a V4 engine.

The first Honda V4 engine developed in 1978 for the Road Racing World Championship

HONDA TECHNOLOGY

AIR BAG

A tank-mounted air bag – unique in motorcycling – is designed to deliver an extra level of safety, and peace of mind to the rider.

ANTI-LOCK BRAKING SYSTEM

Reduces braking pressure by monitoring the wheel speed, preventing the wheels from locking up.

COMBINED BRAKE SYSTEM

Actuates both front and rear brakes when the rear brake pedal (or lever) is engaged, for a smooth and confident balance of braking control.

DUAL CLUTCH TRANSMISSION

Combines the riding enjoyment of a manual transmission with the convenience of an automatic, delivering enhanced comfort and sporty performance.

EURO 4

Complies with EURO 4 emissions regulations.

EURO 5

Complies with EURO 5 emissions regulations.

HONDA EVOLUTIONARY CATALYSING SYSTEM

Oxygen-sensing system maintains an optimal air/fuel mixture for the most effective catalytic reduction of exhaust emissions.

HONDA IGNITION SECURITY SYSTEM

Only allows the bike to be started by its original encoded keys to effectively protect against theft.

HONDA MULTI-ACTION SYSTEM

Cartridge-type front fork and rear damper design ensures a confident balance of compliant damping and precise handling.

HONDA SELECTABLE TORQUE CONTROL

If the Honda Selectable Torque Control (HSTC) system senses an imminent loss of rear wheel traction it reduces torque to allow the tyre to grip. Multiple levels are selectable according to riding mode or user preference.

HONDA SELECTABLE TORQUE CONTROL

If the Honda Selectable Torque Control (HSTC) system senses an imminent loss of rear wheel traction it reduces torque to allow the tyre to grip.

Honda has developed and applied many innovative technologies for its motorcycle range, designed to have the greatest possible benefit for you and the world around you.

HILL START ASSIST

After stopping on an incline an extra squeeze of brake maintains hydraulic pressure to the rear caliper – when it's time to move simply open the throttle.

LED LIGHTS

Brighter and more energy efficient than traditional bulbs, with no time delay and a longer life.

PROGRAMMED FUEL INJECTION

Map-type computerised system maintains strong power and responsive performance in all conditions.

SHOWA DUAL BENDING VALVE

Showa Dual Bending Valve forks improve ride comfort and handling by delivering proportional rebound damping with firmer compression damping.

SHOWA USD FORK

Larger diameter tubes above and smaller tubes at the bottom increase surface area providing more rigidity to deal with off road terrain.

REVERSE GEAR

Getting the Gold Wing into – or out of – wherever you want it is made effortless by the addition of an easy-to-use reverse gear.

SMART KEY

This innovative technology improves both convenience and security. As long as your key is in your pocket or bag, you can release the seat and start the engine with the press of a button.

TWS RIDING MODE SELECT SYSTEM

Giving a choice of 3 riding modes; Mode 1 delivers standard ECU maps, Mode 2 provides smoother throttle control and Mode 3 returns a more aggressive power delivery.

RADIAL MOUNT CALIPERS

Offers better alignment to the disc and rigidity. Radial-mount calipers are secured and supported at both ends providing less caliper flex and better braking performance

USB CHARGING

We've subtly integrated a USB socket into the under-seat storage compartment. No need for an adaptor; simply connect your device's lead, plug it in, and go.

17 INCH WHEEL

Large diameter front wheel give extra stability over rough or cobbled city streets and therefore confident, reassuring handling.

HONDA DCT DUAL CLUTCH TRANSMISSION

DCT is an automated clutch and shift operation system that retains the direct acceleration feel of a manual transmission with the ease of use of an automatic. DCT allows the rider to focus on accelerating, turning and braking, rather than gear shifting. This increases confidence and control for the rider. DCT technology takes the joy of riding and controlling your machine to the next level.

FREEDOM

Ride without concerning yourself with the clutch lever and shift pedal, for smooth and seamless gear changes.

2 AUTOMATIC MODES

- S -Sport- For a more sporty driving style.
- D -Drive- For relaxed city and highway driving.

1 MANUAL SELECT MODE

MT, with change of gear via left hand.

NEW G SWITCH*

Improves rear wheel traction when off-road.

*Only for Africa Twin & X-ADV.

CONTROL

Switch between auto and manual mode to suit any riding environment. Eliminate shift shocks like an expert biker.

The specific details of this brochure do not apply to any particular product supplied or offered for sale. Manufacturers reserve the right to vary specifications, including colours, with or without notice at such times in such manner as deemed appropriate. Major as well as minor changes may be involved. Every effort, however, is made to ensure the accuracy of the particulars contained in this brochure. Consult your Dealer for details regarding the specifications of any featured product. This publication shall not constitute - under any circumstances whatsoever - an offer by the Company to any individual. All sales are made by the Distributor or Dealer subject to and with the benefit of the standard Conditions of Sale and Warranty provided by the Distributor or Dealer, copies of which may be obtained upon request. While efforts are made to ensure specification accuracy, brochures are prepared and printed several months in advance of distribution and consequently cannot always immediately reflect either changes in specification or in some isolated cases the provision of a particular feature. Customers are always advised to discuss specific details with the supplying Dealer, especially if a selection is dependent upon one of the features advertised. Please contact your local dealer for information and specifications. Please note that the fuel consumption figures provided are results obtained by Honda under standardised testing conditions prescribed by WMTC. Tests are conducted on a rolling road using a standard version of the vehicle with only one rider and no additional optional equipment. Actual fuel consumption may vary depending on how you ride, how you maintain your vehicle, weather, road conditions, tyre pressure, installation of accessories, cargo, rider and passenger weight, and other factors. You accept that if you do go ahead and make a purchase or enter into any kind of transaction, whether for payment or not, you did so entirely in reliance on your own skill and judgement and not on that of anyone else.

RIDE WITH STYLE Read the owner's manual thoroughly. Get to know your machine and its capabilities. Concentration assists anticipation. Observe other road users' movements. Brake in plenty of time. Always wear a helmet and quality kit, ride fit and NEVER after drinking alcohol. Good roadcraft and courtesy identify the skilled and stylish rider. Honda endorse the law that all helmet visors must comply with BS 4110. Visors that transmit less than 50% of visible light cannot legally be used on the road.
