

MAZDA CX-60

PRICES & SPECIFICATIONS

MAZDA CX-60

Introducing the Mazda CX-60, our luxury SUV that redefines elegance and power. Masterfully crafted using our award-winning Kodo: Soul of Motion design philosophy, its bold exterior effortlessly complements an exquisitely appointed interior, a driver-centric cabin, and Mazda's legendary driving dynamics—creating an unparalleled driving experience that fuses luxury with exceptional handling.

The Mazda CX-60 offers a range of powertrains, each showcasing cutting-edge Mazda technology. Our first Plug-in Hybrid Electric Vehicle (PHEV) delivers remarkable performance and exceptional environmental credentials, achieving an impressive 201.8mpg with CO₂ emissions from just 32g/km.

Also available is our latest e-Skyactiv Diesel technology, offered in both 200ps rear-wheel drive and 254ps Mazda i-Activ all-wheel drive variants. Featuring groundbreaking advanced combustion technology, this diesel engine ranks among the cleanest in the world.

Undoubtedly, the Mazda CX-60 will captivate you from the very first glance.

THE LATEST IN TECHNOLOGY & CONVENIENCE

MAZDA CONNECT

The latest in-car infotainment

Mazda Connect offers effortless connectivity between you and your Mazda, with information displayed on a stunningly clear 12.3" central screen, perfectly positioned at eye level.

Access essential vehicle information and settings, enjoy entertainment options such as DAB Radio, and seamlessly connect your smartphone via Bluetooth to make calls, view contacts, and utilise the comprehensive European-wide hybrid navigation system to provide traffic updates and route options, all with 7-years of free map updates.

WIRELESS APPLE CARPLAY® & ANDROID AUTO™

Smarter, safer way to use your smartphone

With wireless Apple CarPlay®, get easy access to Apple Music, Maps, Messages and make phone calls with Siri through the car's Multimedia Commander and touchscreen.

Wireless Android Auto™ also allows you to access your favourite music and messaging apps, Google Maps and YouTube Music. Google Assistant voice control helps you send and receive messages, make calls, get directions and plan your day while you keep your eyes safely on the road.

THE LATEST IN TECHNOLOGY & CONVENIENCE

MAZDA Mi-DRIVE

Intelligent Drive Select System

Mi-DRIVE is a system that switches driving modes depending on the road and vehicle conditions. Featured on all grades, Sport mode enhances vehicle responsiveness when the accelerator pedal is pressed.

All-Wheel Drive models gain additional functionality. When driving on rough terrain and slippery road conditions, Off-Road mode prevents the driven wheels from spinning when driving, improving road-holding performance. Towing mode optimises driving performance due to increased weight when towing a trailer, refining vehicle stability. PHEV models also benefit from EV mode which allows you to drive the vehicle utilising the electrical motor, cutting down on fuel usage and emissions.

MYMAZDA APP CONNECTIVITY

Controls at your fingertips

The Mazda CX-60 can share vehicle information with the MyMazda app via Connected Services. This provides several features which enhances the connection between you and your Mazda.

In addition, the Mazda CX-60 PHEV has the ability to not only monitor and control your charging, but also has the ability to heat or cool the cabin prior to your departure, as well as control the front and rear defrost function on those frosty mornings.

Further information on these features and more can be found at www.mazda.co.uk/owners/connectivity/

THE LATEST IN TECHNOLOGY & CONVENIENCE

12.3" COLOUR ACTIVE DRIVING DISPLAY

Key information within your eyeline

Fitted as standard, the 12.3" colour Active Driving Display is a technology feature that projects key information directly onto the windscreen within the driver's line of sight.

Information includes vehicle speed, cruise control settings and will provide satellite navigation directions in relation to the Mazda Navigation System.

12.3" DIGITAL INSTRUMENT CLUSTER

Immerse yourself in the drive

Working in harmony with the Mi-DRIVE system, the digital instrument cluster provides individual driving displays for each driving mode. This ensures that the instrument cluster displays the most important information, which in combination with the 12.3" Active Driving Display (Head-up display) contributes to a safer driving environment, as well as helping the driver to immerse themselves more in the drive.

THE LATEST IN TECHNOLOGY & CONVENIENCE

BOSE PREMIUM SOUND SYSTEM

Made to move you

The high-performance speakers make you feel like you're at the front row of your favourite concert, making you feel immersed in whatever you're listening to.

The premium sound system includes all the latest Bose technologies such as CenterPoint, BassMatch and AudioPilot which all contribute to an immersive entertainment experience.

(Not available on Exclusive-Line grades)

MULTIMEDIA COMMANDER

Easy to use, driver centric, eyes on the road

The Multimedia Commander provides simple and easy access to the Mazda Connect infotainment system. The tactile feel plays to the senses allowing for ease of use whilst on the move, and more importantly, allows you to keep your eyes on the road.

WEEKEND AWAY, PACK YOUR BAGS

Your ultimate companion for the perfect weekend getaway. With a spacious 570-litre boot, the Mazda CX-60 ensures you can bring everything you need. Practicality is taken to new heights with the 40:20:40 split rear seats, offering versatile loading options and expanding capacity to an impressive 1,726 litres.

Need to load the boot with your hands full? No problem—simply swipe your foot beneath the rear bumper, and the hands-free power liftgate will effortlessly open or close.

BUILT TO TOW UP TO 2,500KG

Mazda believe in the 'right-sized' approach to engine capacity. By increasing the engine's size of both our PHEV and Diesel powertrains, we create a larger combustion chamber that allows for a more powerful and efficient combustion process. The result? Lower emissions, exceptional fuel economy, and a surge of torque that provides you with the ability to tow up to 2,500kg.

It's the perfect combination of performance and sustainability - engineered to give you an exhilarating and unforgettable driving experience!

ADDED REASSURANCE

The PHEV provides up to 500Nm of torque whilst the Diesel offers up to 550Nm. Our i-ACTIV AWD system provides increased torque to the rear wheels, improving stability on Motorways and unpaved roads, whilst the Dynamic Stability Control enhances traction through rough terrain.

Stability is the most important quality you can look for in a tow car, which is why both our Trailer Stability Control, and our Mi-DRIVE Intelligent Drive Select System (which provides a bespoke Towing mode[^]), are designed to increase the stability of the vehicle during towing. Helping to suppress any potential swaying and providing a smooth confident drive.

[^]Activates once you equip your Mazda CX-60 with an approved Mazda Tow Bar.

EXCLUSIVE-LINE

from £46,940

Mazda CX-60 327ps AWD Exclusive-Line Auto in Platinum Quartz

18" Grey alloy wheels

Black leather seat trim[^]

SAFETY AND SECURITY						
Airbag:	Front dual stage driver and single stage front passenger	●	●	●	●	●
	Front and rear side airbags	●	●	●	●	●
	Front central airbag	●	●	●	●	●
	Front and rear curtain airbags	●	●	●	●	●
	Front driver knee airbag	●	●	●	●	●
	Front passenger airbag deactivation system (auto switch)	●	●	●	●	●
Alarm & Immobiliser	Thatcham approved immobiliser and an alarm meeting ECE requirements	●	●	●	●	●
Anti-lock Braking System (ABS):	Prevents the wheels from locking, caused by braking on slippery roads, and maintains driving directional stability and ensures steerability	●	●	●	●	●
Blind Spot Monitoring (BSM):	Using radars mounted in the rear bumper to detect vehicles approaching from behind and in the adjacent lane. It alerts the driver with audible and visual warnings to the presence of vehicles in their blind spot on either side of the vehicle.	●	●	●	●	●
Driver Attention Alert (DAA):	Designed to reduce accidents caused by inattentiveness due to driver fatigue. The system watches inputs and the vehicle's movements in the early stages before fatigue is a factor.	●	●	●	●	●
Driver Monitoring (DM):	Uses the Driver Monitoring Camera to alert the driver if drowsy or inattentive driving is detected	○	●	●	●	●
Dynamic Stability Control (DSC):	Automatically controls braking and engine power output in conjunction with systems such as the ABS and TCS to help control side slip when driving on slippery surfaces, or during sudden or evasive steering, which enhances vehicle stability.	●	●	●	●	●
e-Call with GPS:	In the case of an accident, either provides a manual or automated message to the emergency services, which includes the vehicle's location. (European locations only).	●	●	●	●	●
Emergency Stop Signalling system (ESS)	If sudden braking is applied, the ESS rapidly flashes all the direction indicator lights to caution drivers behind your vehicle of the sudden braking situation. The ESS operates when sudden braking is applied while the vehicle speed is approximately 34 mph or faster.	●	●	●	●	●
Emergency tyre repair kit:	Included with your Mazda is for a temporary repair of a slightly damaged flat tyre resulting from running over nails or similar sharp objects on the road surface. Perform the emergency flat tyre repair without removing the nail or similar sharp object which punctured the tyre	●	●	●	●	●
Emergency Lane-Keeping:	Blind Spot Assist - Assists steering operation when changing lanes despite the risk of a potential collision. It detects vehicles approaching from the rear or side of the vehicle when the vehicle is travelling at approximately 37mph or above.	●	●	●	●	●
	Road Keep Assist - Enhanced camera function to enable the detection of grass and curbs along the roadside to help prevent departure from the road even on roads without lanes. Activates when the vehicle is traveling at approximately 37mph or above, assisting steering operation when there is a risk that the vehicle may depart from the road.	●	●	●	●	●
Front Cross Traffic Alert (FCTA):	When pulling out of junctions, the system checks for approaching vehicles in your blind spots either side or the front of your vehicle. When an oncoming vehicle is detected, it sounds a warning	○	○	●	○	●
Hill Descent Control (AWD models only):	Supports safe downhill driving on steep slopes with slippery, rough road surfaces such as offroad terrain or snow-covered hills. It does this by automatically keeping the car at a constant speed without the driver needing to operate the brakes.	●	●	●	●	●
Hill Launch Assist (HLA):	When starting off from an incline, HLA helps prevent the car from rolling backwards when the driver moves their foot from the brake to the accelerator pedal by maintaining an automatic brake.	●	●	●	●	●
ISOFIX child seat anchorage:	Attached to outer rear seats	●	●	●	●	●
Lane Departure Warning System (LDWS):	Notifies the driver that the vehicle might be deviating from its lane. If there is a possibility of your vehicle deviating from the vehicle lane, a screen display and a warning sound notify the driver of the danger.	●	●	●	●	●
Lane-keep Assist System (LAS):	Working in harmony with the Lane Departure Warning System, LAS helps the driver stay within the vehicle lane if the vehicle might be deviating. If your vehicle may be deviating from the vehicle lane, the LAS provides steering assistance to avoid departure from the lane.	●	●	●	●	●

SAFETY AND SECURITY continued		EXCLUSIVE-LINE	HOMURA	HOMURA PLUS	TAKUMI	TAKUMI PLUS
Pre-crash safety:	Smart Brake Support Front (SBS) - SBS is a system designed to avoid or reduce damage in the event of a collision by controlling the brakes. Sensors and camera equipped on the vehicle detects objects, and operate brake control if there is a possibility of your vehicle colliding with the object. The system also features:- - Turn-Across Traffic - Designed to assist the driver in avoiding a collision with a vehicle approaching in the opposite direction when making a right turn at an intersection and to reduce damage in the event of a collision.	●	●	●	●	●
	Smart Brake Support Rear (SBS-R) - designed to reduce the risk of accidents by helping the driver avoid rear-end collisions by applying automatic braking.	○	○	●	○	●
	Smart Brake Support Rear Crossing (SBS-RC) - detects vehicles approaching from the rear left and right sides of the vehicle, and the rear of the vehicle while the vehicle is being reversed out of a parking space, and applies the brakes	○	○	●	○	●
Rear Cross Traffic Alert (RCTA):	Designed to help you make sure it's safe to start backing up. The system uses the same radars and indicators as BSM to watch for vehicles coming from both sides, and alerts the driver when they come near.	●	●	●	●	●
Remote central locking with deadlocking and automatic door lock when driving		●	●	●	●	●
Smart keyless entry:	Allows opening and locking of the vehicle without removing the key from your pocket or bag	●	●	●	●	●
Seatbelt reminder audible warning:	Driver, passenger and rear seats	●	●	●	●	●
Traffic Sign Recognition (TSR) with intelligent speed assist:	Utilising the front sensing camera and Navigation data, this system is designed to notify the driver of traffic signs by displaying them on the instrument panel and the head-up display. If the vehicle exceeds the recognised speed limit, an audible tone will be activated.	●	●	●	●	●
Tyre Pressure Monitoring System (TPMS):	Monitors the air pressure of each tyre and informs the driver of a decrease in pressure when it becomes lower than the specified air pressure.	●	●	●	●	●
Trailer Stability Control (TSC):	TSC is a system that increases the stability of the vehicle during towing. When vehicle sway occurs during towing, the TSC controls the output of the brakes and the engine to suppress swaying.	●	●	●	●	●
Vehicle exit warning:	Assists the driver in checking the rear of the vehicle when exiting the vehicle. When a vehicle or bicycle approaching from the rear is detected, various screen displays and warning sounds notify the driver of the danger	●	●	●	●	●

* These figures were obtained using a combination of battery power and fuel. The Mazda CX-60 is a plug-in hybrid vehicle requiring mains electricity for charging.

¹⁾ Figures shown are for comparability purposes and may reflect Euro 6d or Euro 6e testing procedures. Please speak to your Mazda dealer for confirmation; only compare fuel consumption and CO₂ figures with other cars tested to the same technical procedures. These figures may not reflect real life driving results, which will depend upon a number of factors including the accessories fitted (post-registration), variations in weather, driving styles and vehicle load. All figures quoted are derived from the latest WLTP test cycle.

²⁾ Towing capacity is based on a 12% gradient and tested in accordance with 92/21/EEC as amended by 95/48/EC

THE LATEST IN TECHNOLOGY & CONVENIENCE

e-SKYACTIV PHEV – PLUG-IN HYBRID ELECTRIC VEHICLE

In order to achieve better environmental performance without compromising on the intuitive driving you come to expect from a Mazda, we developed our first Plug-in Hybrid vehicle, the Mazda CX-60. Ideal for those drivers who want to transition into the EV lifestyle.

This e-Skyactiv Plug-in Hybrid SUV is the most powerful car Mazda has produced. It is equipped with a naturally-aspirated four-cylinder 2.5-litre engine, coupled with a 129KW electric motor and a 355V, 17.8kWh high-capacity lithium-ion battery. This combination of engine and motor delivers a total system output of 327ps and 500Nm of torque.

Mazda's first PHEV also displays outstanding environmental credentials with the ability to drive up to 39.15 - 39.77 miles of electric motor-powered driving, meaning that the vehicle will use no petrol and produce 0g/km of CO₂. Using a combination of both petrol and electric driving, the Mazda CX-60 provides WLTP weighted combined fuel consumption of 201.8mpg, and WLTP weighted combined CO₂ emissions from only 32g/km.

CHARGING OVERVIEW

What you need to know...

- The Mazda CX-60 is compatible with the most common charging connectors (Type2) for both at home and out-of-home charging, via AC.
- Charging cables and power sockets are completely waterproof so can be used at any time to charge your Mazda CX-60.
- The sockets lock into the car, meaning it is secure and safe to leave unattended.
- A Type 2 Mode 2 cable for AC charging via a UK 3-pin plug and a Type 2 Mode 3 cable for AC charging via home or public charge points are both included with the car.
- Maximum charge of 7.2kW taking approximately 2 hours 20 minutes to charge from 0-100%.^

*Figures shown are for comparability purposes; only compare fuel/energy consumption and CO₂ figures with other cars tested to the same technical procedures. These figures may not reflect real life driving results, which will depend upon a number of factors including the starting charge of the battery, accessories fitted (post-registration), variations in weather, driving styles and vehicle load, and use of features such as air conditioning or heated seats. All figures quoted are derived from the latest WLTP test cycle. For BiK purposes, 39.15 - 39.77 miles is rounded up to 40 miles as per HMRC legislation and therefore qualifies for 9% BiK 2025/26.

^Charging times are based on an ambient temperature of 20°C and will vary depending on a variety of factors including the output of the charger being used, ambient temperature and battery state.

e-SKYACTIV D MHEV – MILD HYBRID ELECTRIC VEHICLE

For those who frequently drive long distances or need to regularly tow heavy loads, we have developed the latest in Diesel engine technology.

Our 3.3-litre in-line six-cylinder e-Skyactiv D diesel engine features Distribution-Controlled Partially Premixed Compression Ignition (DCPCI) Technology. This highly innovative advanced combustion technology makes the e-Skyactiv D one of the cleanest diesel engines in the world.

Developed using our 'right sizing' concept which optimises displacement to improve both fuel and power efficiency, the direct injection inline-six cylinder e-Skyactiv D is available with a choice of two power outputs: 200ps with rear-wheel drive which provides 450Nm of torque, and 254ps with Mazda i-Activ AWD (all-wheel drive) which provides 550Nm of torque.

Both Diesel powertrains feature a 48v Mazda M Hybrid Boost system. Our innovative evolution of mild hybrid vehicle technology uses three main components to capture energy that is normally wasted during braking. It stores that energy within the 48v Lithium-ion Battery and uses it to assist the engine and power the car's electrical systems, meaning you can drive further on a tank of fuel whilst also contributing to lower CO₂ emissions and other particulates.

SKYACTIV-VEHICLE DYNAMICS: TRANSMISSIONS, CHASSIS AND DYNAMICS

TRANSMISSIONS

Mazda's eight-speed automatic transmission is designed to offer drivers a smooth and responsive gear shift with slick steps between ratios, achieving the right balance between driver engagement, comfort, dynamic performance and environmental efficiency.

This transmission replaces the torque converter with a clutch, so that the torque of the engine and the electric motor is transmitted directly, with a similar fast shifting feel akin to a manual transmission.

SKYACTIV-CHASSIS

Providing a lightweight chassis that delivers driving pleasure and comfort, leading to that pure 'Jinba-ittai' oneness between car and driver.

The perfectly fine tuned chassis provides our famed driving experience of agility at low and medium speeds, and stability at motorway speeds for both driving pleasure and comfort.

DYNAMICS

In order to offer a driving experience that makes it possible for drivers to control a more powerful car and enjoy an exciting driving feel, the Mazda CX-60 uses Skyactiv Multi-Solution Scalable Architecture, our new vehicle architecture technology that's compatible with a longitudinal engine and rear-wheel-drive layout.

Skyactiv Multi-Solution Scalable Architecture features numerous enhancements that improve that Jinba-Ittai driving feeling, such as rigidity that ensures drivers can feel vehicle response without lag, seats that make it even easier for everyone in the car to maintain balance while the car is moving, and suspension that stabilises vehicle posture while driving. As a result, the Mazda CX-60 makes it possible for drivers to enjoy a truly great drive.

ADVANCED SAFETY TECHNOLOGY

DRIVER MONITORING

Detects sleepiness or inattention by monitoring changes in expression or movement of the driver's line of sight. A camera and infrared LED monitor the driver's condition both day and night. If the system determines that the driver has fallen asleep or is inattentive, it sounds an alert to make the driver aware while also setting up for automatic braking to help prepare for a potential incident.

(Optional as part of Comfort Pack on Exclusive-Line, standard on Homura, Homura Plus, Takumi & Takumi Plus)

COLOUR ACTIVE DRIVING DISPLAY (HEAD-UP DISPLAY)

The system projects full-colour information directly onto the windscreen within the driver's line of sight. The displayed information includes Traffic Sign Recognition, Mazda navigation turn-by-turn directions, as well as vehicle status including current speed and advanced safety equipment status.

(Standard across the range)

MAZDA DRIVER PERSONALISATION SYSTEM

The Mazda Driver Personalisation System recognises the driver using the camera inside the vehicle, and automatically restores various driver settings that have been stored. This includes a function that automatically adjusts the driver's seat, Active Driving Display, outer mirror angle and steering wheel position based on the driver's physique. The system will also move the seat and the steering wheel so that the driver can easily enter and exit the vehicle.

(Optional as part of Comfort Pack on Exclusive-Line (excludes steering wheel function & Ingress/Egress support), standard on Homura, Homura Plus, Takumi & Takumi Plus)

360° VIEW MONITOR WITH SEE-THROUGH VIEW

Displays a 360° image using front, side and rear cameras with guide lines to assist in checking the area at the front, rear and sides of the vehicle when driving forward, parking or stopping. See-Through View provides a display of the front or rear of the vehicle as though it was transparent.

(Optional as part of Convenience & Driver Assistance Pack on Exclusive-Line, Homura & Takumi. Standard on Homura Plus and Takumi Plus)

ADVANCED SAFETY TECHNOLOGY

ADAPTIVE LED HEADLIGHTS

Mazda's Adaptive LED Headlights provide the ultimate in headlight technology, lighting up the road ahead as if it were daytime and allowing anybody to enjoy safe and stress-free driving at any time. The system increases visibility at night to help drivers stay vigilant by combining four technologies: Wide-range Low Beams which light up a wider area at low speeds, Marking light which brightly illuminates pedestrians that may collide with the vehicle, Highway mode which helps you see further when travelling at speed, and Glare-free High Beams which automatically dim part of the illuminated area to avoid dazzling other drivers.

(Optional as part of Convenience & Driver Assistance Pack on Exclusive-Line, Homura & Takumi. Standard on Homura Plus and Takumi Plus)

FRONT CROSS TRAFFIC ALERT

Mazda's newly developed system detects other vehicles approaching from blind spots at the front right or left of the vehicle, and alerts the driver of their presence. If the driver depresses the accelerator and the system detects an oncoming vehicle, it will operate the brakes to stop or reduce the chance of a collision. This helps prevent a common cause of accidents when cars enter a T-junction with a partially obscured view.

(Optional as part of Convenience & Driver Assistance Pack on Exclusive-Line, Homura & Takumi. Standard on Homura Plus and Takumi Plus)

MAZDA RADAR CRUISE CONTROL

To activate, the driver sets a maximum speed (just as with cruise control) and size of the gap to maintain. The radar watches for traffic ahead and once the system senses a vehicle in front, the car will slow down and speed up automatically maintaining the drivers pre-set distance. The system also features 'Stop & Go' function, meaning the vehicle will automatically accelerate and brake in start/stop traffic with minimal input from the driver.

(Optional as part of Convenience & Driver Assistance Pack on Exclusive-Line, Homura & Takumi. Standard on Homura Plus and Takumi Plus)

ADVANCED SAFETY TECHNOLOGY

CRUISING & TRAFFIC SUPPORT (CTS)

Automatically operates acceleration and braking to maintain a proper trailing distance between your Mazda and the vehicle ahead. In addition, it assists with steering operations to keep the car within its lane. CTS contributes to reducing driver fatigue, as well as supporting a safer, more reassuring and more comfortable driving experience.

(Optional as part of Convenience & Driver Assistance Pack on Exclusive-Line, Homura & Takumi. Standard on Homura Plus and Takumi Plus)

SMART BRAKE SUPPORT – FRONT WITH TURN-ACROSS TRAFFIC

SBS alerts the driver of a possible collision using the warning indications in the display, and a warning sound if the front radar sensor and Forward Sensing Camera determine that there is the possibility of a collision with a vehicle, pedestrian, or a bicycle ahead. Furthermore, if a collision is unavoidable, the automatic brake control is performed to reduce damage in the event of a collision. In addition, when the driver depresses the brake pedal, the brakes are applied firmly and quickly to assist.

The Turn-Across Traffic function is designed to assist the driver in avoiding a collision (or reducing the impact) with a vehicle approaching in the opposite direction when making a turn at a junction.

(Standard across the range)

SMART BRAKE SUPPORT – REAR

Reduces damage in the event of a collision by operating the brake control when the system's sensors detect an obstruction at the rear.

SMART BRAKE SUPPORT – REAR CROSSING

Assists in avoiding collisions and reducing damage whilst the vehicle is in reverse. If there is the possibility of an impact with a vehicle approaching from the rear, the system will apply the brakes.

(Optional as part of Convenience & Driver Assistance Pack on Exclusive-Line, Homura & Takumi. Standard on Homura Plus and Takumi Plus)

ADVANCED SAFETY TECHNOLOGY

BLIND SPOT MONITORING (BSM) WITH REAR CROSS TRAFFIC ALERT (RCTA)

BSM uses radars mounted in the rear bumper to detect vehicles approaching from behind and in the adjacent lane. It alerts the driver to the presence of vehicles in the blind spot on either side by displaying an icon in the appropriate door mirror. If the driver indicates to change lanes with a vehicle in the blind spot, the icon flashes and a warning beep is sounded.

RCTA is designed to help you make sure it's safe to start backing up. The system uses the same radars and indicators as BSM to watch for vehicles coming from both sides, and alerts the driver when they come near.

(Standard across the range)

DRIVER ATTENTION ALERT

Designed to reduce accidents caused by inattentiveness due to driver fatigue. The system comes into play at speeds above 41mph and begins to "learn" the driver's habits, watching inputs and the vehicle's movements in the early stages before fatigue is a factor. Later, if the system detects changes in vehicle behaviour that suggest the driver may be losing concentration, it will suggest a rest stop by sounding a chime and displaying a warning in the Multi-Information Display.

(Standard across the range)

LANE-KEEP ASSIST SYSTEM WITH LANE DEPARTURE WARNING SYSTEM

Designed to prevent your vehicle from inadvertently straying from its lane. A front view camera monitors the road ahead and calculates the car's position relative to the lane markings. If the system detects the vehicle is moving out of its lane unintentionally, the steering wheel will vibrate and an audible alert will sound. The system will also take corrective action to help you stay within the lanes through assisted steering.

(Standard across the range)

VEHICLE TAX RATES

VEHICLE TAX RATES TAX YEAR 2025-26

CO ₂ EMISSIONS FIGURE (G/KM)	ALL CARS FIRST YEAR RATE	ALL CARS STANDARD RATE (12 months)
0	£10	£195
1-50	£110	£195
51-75	£130	£195
76-90	£270	£195
91-100	£350	£195
101-110	£390	£195
111-130	£440	£195
131-150	£540	£195
151-170	£1,360	£195
171-190	£2,190	£195
191-225	£3,300	£195
226-255	£4,680	£195
Over 255	£5,490	£195

First-year rate is paid when first registering a vehicle and is for the first 12 months Vehicle Excise Duty. After the first 12 months, the standard rate applicable at that time is payable. Vehicles with a list price >£40k will be subject to a premium of £425 over the Standard Rate for 5 years from the start of the second licence.

WARRANTY

All Mazda cars registered from 1st September 2025 will benefit from a six-year manufacturer's warranty, or 100,000 miles, whichever comes first.

e-SKYACTIV PHEV BATTERY WARRANTY

MODEL	WARRANTY PERIOD
e-SKYACTIV PHEV	8-year / 100,000 mile warranty

MAZDA SERVICES

The maximum service interval for your Mazda is 12,500 miles or 12 months whichever occurs first, however, the servicing intervals may reduce based on the style of driving and the conditions under which your vehicle is operated.

MAZDA FINANCIAL SERVICES

Mazda Financial Services offers a variety of finance and insurance products to suit the needs of both private and business customers. With our wide range of plans and services, no-one is more committed to delivering complete motoring confidence and total peace of mind than Mazda and Mazda Financial Services.†

MAZDA EXCESS RETURN VOUCHER

When you apply for Free Driveaway Insurance for your new Mazda, you'll also receive a free 1-year Excess Return voucher which pays back up to £250 of your insurance excess cost, regardless of who you're insured with, if you use our Call Mazda First service. If you have a Mazda Excess Return voucher and need to make an insurance claim, simply Call Mazda First before your insurer on 0800 015 0367.

MAZDA INSURANCE

When you buy your new Mazda from a Mazda franchised dealer, we'll give you free comprehensive Driveaway Insurance so you can get on the road there and then. Upgrade to our annual cover and benefit from our Mazda Accident Repair Promise all year round. In the event of an accident, unlike most other insurers, we guarantee to repair your Mazda at a Mazda Approved Bodyshop using only Mazda Genuine Parts. This helps to protect your Mazda's safety rating, resale value and manufacturer warranty. Plus, you'll also get windscreen damage cover, EU cover and a complimentary courtesy car. We'll even pay your cancellation fee if you're insured elsewhere*. Eligibility criteria, terms and conditions apply.

Ask your dealer or call Mazda Insurance on 0330 102 7995.

Get a quote online at www.mazdacarinsurance.co.uk

Mazda Insurance is arranged and administered by Verex Insurance Services Ltd which arranges policies from a panel of insurers.

*Offer not available online. Offer conditions apply.

FREE MAZDA ACCIDENT AFTERCARE

In the event of an accident, Call Mazda First 0800 015 0367 before your insurer for free 24-hour Accident AfterCare and to redeem your £250 Excess Return voucher. Our dedicated case handlers will liaise with your insurer and arrange Mazda Genuine Parts and repairs at a Mazda Approved Bodyshop, keeping your Mazda 100% Mazda and maintaining your Mazda warranties. We'll also provide accident recovery if your Mazda isn't driveable and a free courtesy car during the repair. Terms and conditions apply.

Save 0800 015 0367 to your mobile phone.

TAX FREE – DIPLOMATIC AND MILITARY SALES
