

# RENAULT SCENIC E-TECH ELECTRIC

1st October 2026

# we've changed everything except its name

The first 100% electric Renault family car to be built in France, Renault Scenic E-Tech electric boasts a curvaceous, aerodynamic design. With a driving range of up to 392 miles<sup>(1)(6)</sup>, it reinvents its DNA with its innovative technologies, its bi-directional charging, its opacifying panoramic sunroof<sup>(2)</sup> and its environmental approach, since it is 89%<sup>(3)</sup> recyclable.

## Technology and eco-responsibility combine to deliver innovative driving pleasure.

|                                                                     |                                                           |                                                                         |

# we've reinvented the car for life and for living

Precision-modelled, the two-tone body features generous curves and sharp edges. Attention to detail, flush door handles make this an unprecedented family vehicle.

version shown is unavailable in the UK

The front end features a new grille and a full LED light signature with half-round daytime running lights.

version shown is unavailable in the UK

At the rear, chiselled lights, body creases and the Scenic monogram reinforce its distinctive style.

version shown is unavailable in the UK

The esprit Alpine versions stand out for their 20" speedway diamond-finish alloy wheels and gloss black front and rear trim. Inside, the sporty seats feature blue top-stitching and the steering wheel has blue, white and red stitching.

# new interior space

Spread over two 12" screens, openR provides a high-performance, high-definition interface. The controls around the steering wheel optimise the ergonomics of the driving position. With the driver recognition system, settings such as the position of the seat and mirrors are automatically stored.

## comfort for all the family

Illuminated by the 1.65 m<sup>2</sup> solarbay<sup>®</sup>(1) opacifying panoramic sunroof, the passenger compartment features ergonomic heated seats(2). Thanks to the flat floor and 27.8 cm of legroom at the rear, there's plenty of space for everyone.

Solarbay<sup>®</sup> technology is voice-activated with Google Assistant(3)(4) or manually via a button located on the courtesy light. With 4 different levels of opacification, it manages light levels and ensures thermal comfort on board in both summer and winter. The system optimises the battery's autonomy by reducing air conditioning and heating consumption.

Altogether, there are more than 38 L of storage space throughout the cabin: on the console, in the seat backs and in the doors.

The boot volume adapts to your needs, offering a load capacity ranging from 545 litres to 1,670 litres with the rear bench seat folded down.

rear bench seat with 40/20/40 folding backrest

charging cable storage in boot 53.8 L

(1) depending on version. (2) depending on version. (3) My rnl connected services are included for 8 years from the delivery date of your vehicle. Google built-in connected services are offered for 3 years or for the duration of your contract concluded with Mobilize Financial Services (all contracts except standard credit) starting from the delivery date of your vehicle. All Google brands are trademarks of Google LLC. (4) Google and Gemini are trademarks of Google LLC. Google Gemini and Gemini Live will be available in a future update. Features may differ depending on subscription, and results may vary. Some connected apps require setup. Compatibility and availability varies. 18+. (5) from the various stages of automotive window production at the Saint-Gobain Sekurit plants.

# up to 392 miles of driving range

Inspired by innovations in research and development, Renault Scenic E-Tech electric pushes back the limits of performance and efficiency: weight distribution, optimised energy management, aerodynamic design.

version shown is unavailable in the UK

Its platform houses an 89 kWh battery and an efficient 160 kW electric motor for a wltп range of up to 392 miles<sup>(1)(2)</sup>.

wheels shown not available in UK

**aerodynamic design**

The lines of Renault Scenic E-Tech electric have been designed to maximise its range: a low, compact car, a front grille with optimised air intake, sculpted rear flanks, flush handles and aerodynamic aluminium wheels.

**heat pump and thermal comfort**

Renault Scenic E-Tech electric comes with a heat pump as standard, combined with a thermal management system for the battery and engine. This automatically regulates battery and engine temperature, and ensures the thermal comfort of the passenger compartment whatever the weather.

**regenerative braking with one pedal**

With its regenerative braking system, Renault Scenic innovates by integrating the new one pedal function. Every time you decelerate, the energy recovery is optimised, and the one pedal mode maximises the action until the vehicle comes to a complete stop, without you having to use the brake pedal. The 5 levels of braking are activated via the paddles on the steering wheel.

**range<sup>(1)</sup>**

**89 kWh battery:**  
▪ up to 392 miles of range<sup>(2)</sup>

(1) in wltп cycle, actual range depends on driving conditions (type of road, driving style and weather conditions). (2) techno 89kWh version only.

# easy to charge

At home, at work or on the move, Renault Scenic E-Tech electric offers you a charging versatility that is unique on the market.

## charging at home

### home charging

**Order your fully installed home charging solution** at your nearest retailer. Our expert partners will guide through the ordering and installation process to make charging your Renault Scenic at home as easy as possible.

### maximum 11 kW AC charging<sup>(1)</sup>

Charge Renault Scenic E-Tech electric **easily at home<sup>(2)</sup>** with a wall-mounted charging station.

### app my rnl

Check your range at any time, start charging remotely or schedule it at off-peak times.

## on-the-go charging

### plug-inn charge pass charging card

**Charge Renault Scenic quickly and easily on the move** with a pass to one of Europe's largest charging networks. The myRNL app allows you to quickly locate your nearest charging station and to check the cost, the charger output and the available connectors. Pay simply and securely by tapping you charge pass on the charging station.

### DC rapid charge<sup>(3)</sup>

On highways, charge from 15% to 80% in only 28 min with the long-range battery (up to 150 kW).

### app my rnl

**Locate the public charging points** closest to your destination.

download the  
my rnl app

(1) optional. (2) home charging station offer. For more information about charging, call 0 800 12 34 56.  
(3) the service only works on compatible DC fast charging stations, free of charge, with the charge pass charging card.

# Renault Scenic E-Tech electric comes with a mode 3<sup>(1)</sup> cable for use with a home<sup>(2)</sup> or public charging point.

## public

**public fast charging point**

## home

**domestic charging station<sup>(2)</sup>**  
7.4 kW AC

mode 3 cable included with purchase

## 89 kWh battery charging

15 to 80% → 28 min | 15 to 80% → 2 hrs 50<sup>(3)</sup> | 15 to 80% → 5 hrs 30 | 15 to 80% → 8 hrs 15 | 15 to 80% → 17 hrs 15 |

(1) mode 3 single-phase cable. (2) home charging station offer. For more information about services, go to the services page or call 0 800 12 34 56 (to be localised for each country). (3) with the on-board 7.4 kW AC single-phase charger, you cannot take advantage of the maximum power offered by the 22 kW AC three-phase terminals. Your charging time will be the same as that of a domestic 7.4 kW charging terminal.

# batteries, a controlled life cycle

As the first carmaker to take action across the entire life cycle of batteries, Renault Group has developed solid expertise in increasing their durability and extending their uses.

The various stages in the life of the Renault Scenic E-Tech electric battery are part of the Refactory programme in Flins, the first plant dedicated to the circular economy.

version shown is unavailable in the UK

## After use, the battery<sup>(1)</sup> can have a second life before being recycled.

|                                                                                     |                                                                                                                                                                                                                                                                                                                                    |
|-------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 100%                                                                                | <b>initial life</b>                                                                                                                                                                                                                                                                                                                |
|  | During its initial life, the battery powers Renault Scenic E-Tech electric engine and delivers electric traction. The battery is designed to last the entire life of the vehicle. At any time during use, customers can contact their dealer network or use their my rnl app to check the health of their battery <sup>(2)</sup> . |
| < 70%                                                                               | <b>second life</b>                                                                                                                                                                                                                                                                                                                 |
|  | When a vehicle reaches the end of its life, the battery often still contains 60% to 70% of its original storage capacity. It can then be reconditioned or reused for storing energy produced by wind turbines and solar fields, for example. This second life can last from 6 to 10 years.                                         |
| < 10%                                                                               | <b>recycling</b>                                                                                                                                                                                                                                                                                                                   |
|  | At the end of its life, the battery begins its recycling phase by being disassembled and the structural elements extracted: plastic, metals and cables are sent separately to their respective recycling facilities and the modules are processed in facilities dedicated to Li-ion batteries.                                     |

(1) the Renault Scenic E-Tech electric battery and all the batteries used for powering an electric car.

(2) available in France only.

# openR link multimedia system with Google built-in

12" openR interface provides access to openR link multimedia system connected services with Google built-in<sup>(1)(2)</sup>. More than 100 apps are available<sup>(1)</sup>.

Simplify your electric journey with Google Maps<sup>(2)</sup> and use a journey planner updated in real time.

electric journey planner

On the road, the system suggests itineraries based on available charging points and your battery life. If there is an obstruction on the road, the route is automatically recalculated and other charging points are suggested based on the new route.

charging stations

Route planning/optimisation with charging points in real time.

charging point

Information on the availability of charging stations, in real time and as forecasts, including the power of each charging point and their compatibility with different payment methods.

charge optimisation

Presetting of the battery temperature for faster charging.

**Voice control: “Hey Google, tell me where the nearest charging points are!”. Plan your journeys, set the temperature, change your driving mode - the voice assistant<sup>(2)</sup> is there to help.**

**In a future update, Google Gemini<sup>(3)</sup> will be available as an opt-in upgrade to Google Assistant. Speak naturally to find the best spots, control vehicle settings, and get more done, all hands-free.**

**Prime Video, Waze, Nextory, Radioplayer for Renault, SongPop for Renault, Amazon Music, with over 100 apps and exclusive content available via Google Play<sup>(4)</sup>.**

**HBO Max** is the premier global streaming platform from Warner Bros. Discovery that delivers the most unique and captivating stories, ranging from the highest quality in scripted programming, movies, documentaries, true crime, adult animation, and live sports and news (where available). HBO Max is the destination for prestigious entertainment brands such as HBO, Warner Bros., Max Originals, DC, Harry Potter, as well as iconic shows like “Friends” and “The Big Bang Theory”, all in one place.

With **Waze**, you always know what is happening on the road. Even if you know the way, Waze will inform you instantly about the traffic, the police, accidents, and much more. If you are experiencing heavy traffic, Waze will change your route to save you time.

Enjoy your favorite movies and TV shows with **Prime Video**, included in your Prime membership. Accessible directly through your openR link multimedia system at no additional cost. Terms and conditions apply, learn more at [primevideo.com/terms](https://primevideo.com/terms)

Discover **Nextory**, the ultimate app for book lovers. Enjoy access to audiobooks, ebooks, magazines, and more. Whether you’re into captivating romances, thrilling mysteries, or engaging press articles, Nextory has the perfect content for you.

**Radioplayer** is the official home of radio, so you can listen to thousands of stations and podcasts for free, and no extra advertising. Our automotive app brings radio together in one place, so there’s a station for every Renault journey.

**EasyPark** makes parking in your Renault a breeze! Our app helps millions of drivers save time and money, while eliminating the hassle and stress of parking in urban areas. EasyPark is available in more than 2,200 cities across Europe for on-street, off-street and garage parking.

Take to the road while listening to playlists, and much more, with **Amazon Music**, included with your Amazon Prime subscription.

(1) depending on version. (2) my rnl connected services are included for 8 years from the delivery date of your vehicle. Google built-in connected services are offered for 3 years or for the duration of your contract concluded with Mobilize Financial Services (all contracts except standard credit) starting from the delivery date of your vehicle. (3) Google and Gemini are trademarks of Google LLC. Google Gemini and Gemini Live will be available in a future update. Features may differ depending on subscription, and results may vary. Some connected apps require setup. Compatibility and availability varies. 18+. (4) downloading apps on Google Play requires to sign in with a Google Account. For the use of applications downloaded on Google Play, you will need a dedicated data plan. The service package included with the purchase of your vehicle contains a volume of 2GB of data per month for 3 years or for the entire duration of Mobilize Financial Services contracts (all contracts excluding classic credit). To activate it, you must verify your identity in your my rnl app. Alternatively, you can share your smartphone’s connection with your car. All Google brands are trademarks of Google LLC.

# audio signatures

Featuring cocoon-effect technology developed by Renault, the passenger compartment is perfectly soundproofed so you can enjoy its Harman Kardon® high-fidelity sound. Five listening modes have been designed to optimise sound reproduction, depending on the source chosen.

A musical sequence composed by Jean-Michel Jarre welcomes drivers and passengers on board, together with a visual animation on the dashboard. Outside, a special sound warns pedestrians that the vehicle is travelling at less than 30 km/h.

\*On-board Infotainment (IVI).

[configure and order →](#)

[menu ↑](#)

# detect, inform, guide

The safety score assesses your ability to drive safely by analysing information about speed, trajectory and stopping distance as you drive. The new driver alertness detection function completes the information taken into account. At the end of each trip, it displays your score from 0 to 100 to help you improve your driving. And, via the "safety monitor" integrated into the dashboard in the form of a widget, receive practical driving tips.

The "safety coach" helps you to improve your driving by using the safety score and informs you in real time of the potential risks on your route, based on the surrounding data.

# 30 advanced driver-assistance systems

**active driver assist with emergency stop assist**  
This system regulates your speed by taking the road environment into account, maintains safe distances and ensures you remain in lane. When traffic slows down, the vehicle stops and restarts automatically.

**360° around view 3D camera**  
The 4 cameras, whose images recreate the vehicle's direct environment 360° around it, allow you to perform your manoeuvres effortlessly.

**rear detection with emergency trajectory correction**  
The system warns you of a potential collision with an overtaking vehicle in the adjacent lane. If a collision is likely, it performs an automatic emergency trajectory correction.

**hands-free parking**  
This system makes it easier to park. Your vehicle handles both finding a parking spot and steering. All you need to manage is the speed.

**occupant safe exit alert**  
This system alerts you if a vehicle is approaching from the rear when you want to open the door.

## driving assistance systems

- active driver assist with emergency stop assist
- hill start assist
- distance warning
- automatic switching between main/dipped headlights
- adaptive vision LED headlights (with integrated fog function)

**Renault aero cargo box™ and 3-bike carrier**

Carry more belongings on your trips with this tow-bar-mounted cargo box, compatible with our tilting platform bike carriers for 2 or 3 bikes, offering an additional 310 L of storage capacity. The vehicle's aerodynamics are preserved, access to the contents of the aero cargo box™ is extremely convenient, and access to the Renault Scenic's boot remains easy.

**double boot floor with storage compartments**

It features 3 storage compartments, perfect for Renault Scenic E-Tech electric. Your charging cables and belongings are easily accessible. Fold down the rear seats to benefit from a flat loading floor.

**large closed organiser for the central console**

Custom-designed for the central console, this large organiser with an elegant design offers a secure and discreet storage space. Its three dedicated areas, including two closed compartments and two easily accessible bottle holders, combine practicality and style.

**foldable multifunction storage unit**

Keep your interior perfectly organised with this 25 L foldable multifunction storage unit. Its large storage capacity easily accommodates groceries, toys, accessories or charging cables, while remaining easy to carry thanks to its integrated handles. Compact and versatile, it can be placed between the seats or in the boot, and can even be used as a footrest or as an occasional seat for a child weighing up to 15 kg.

**car seat for pets up to 15 kg and safety leash**

Travel with peace of mind with this comfortable and stylish car seat, designed with your pet's comfort in mind. Easy to install, it protects the upholstery and ensures optimum safety thanks to its integrated lead. Whether you're using it in the car or out and about, choose a lead that can be attached to the seatbelt anchor point or the Isofix mounting.

**the human first program  
is a comprehensive safety  
programme developed by Renault  
in collaboration with researchers,  
experts and firefighters.**

**because road safety concerns  
all road users, whether they are  
pedestrians, cyclists, motorists,  
the human first program  
by Renault is committed to:**

- 1. prevent accidents by developing safety equipment  
and advanced driver-assistance and safety systems**  
  
up to 34 advanced driver-assistance systems/  
more than 60 safety features, up to 7 airbags,  
child seats (Isofix), Renault Fixe4sure solution/  
more than 2,000 safety-related patents filed since 1970
  
- 2. manage accidents once they have happened by drawing on  
innovations developed in collaboration with the fire service**  
  
QRescue/Fireman Access/more than 5,000 firefighters  
trained over the past 10 years in 20 countries throughout  
the world/around 400 cars given per year for their training
  
- 3. reduce the number of accidents and their severity  
by investing massively in R&D**  
  
safety score/safety coach/connected services/big data/  
artificial intelligence and cybersecurity systems

# glossary

## **E-Tech**

Electric, full hybrid and plug-in hybrid powertrain electrification technology developed by Renault.

## **regenerative braking**

System for the recovery of energy during braking, which increases the vehicle's driving range: whenever the vehicle slows down, part of its kinetic energy is converted into electricity. The battery recharges when the driver lifts his or her foot off the accelerator pedal or presses slightly on the brake pedal.

## **domestic charging point**

Delivers a much higher intensity than a standard domestic socket, for more efficient and faster charging. It enables safer home charging thanks to its systems for controlling charging and protecting against overvoltage.

## **flexi-charger**

Charging cable that can be used to plug a car into a domestic power outlet. Designed for occasional home charging, the flexi-charger should preferably be plugged into an electrical socket connected to a specific earth connection.

## **mode 2 cable**

For domestic use, this cable is needed to charge an electric vehicle using conventional sockets.

## **mode 3 cable**

Cable fitted with a mode 3 end piece specific to charging stations. This cable is needed to charge the electric vehicle on a wallbox or with public infrastructure.

## **useful capacity**

Amount of energy contained in the battery that can be used by the vehicle. Value expressed in kilowatt hours (kWh).

## **kWh**

Abbreviation of kilowatt hour. Unit of energy which corresponds to 1 kW of power consumed over one hour.

## **kW**

Abbreviation of kilowatt. Unit used to measure the power of a vehicle's engine, whether it is electric or powered by an internal combustion engine. The kilowatt measures the direct current (DC) or alternating current (AC) charging power.

## **AC charge**

Low to medium power alternating current charging (max. 11 kW). This is the charging method most commonly found in homes or at most public charging points.

## **DC charge**

Rapid direct current charging (min. 50 kW). Requires a specific fast charging point, available only on the public network.

## **my rnl**

Renault app connected to your vehicle that can be downloaded onto your phone from Google Play or the App Store. You can use it to locate nearby charging stations, find your vehicle, schedule charging and plan your journey in advance, as well as to display remaining range and preset the temperature of the passenger compartment.

## **heat pump**

Equipment used to heat the passenger compartment of your electric car. The heat pump significantly reduces your consumption of electrical energy and maximises your driving range when the exterior temperature drops below 15°C.

## **kWh/100 km**

Unit of measurement for the average consumption of energy of an electric or plug-in hybrid car over a distance of 100 km. This is the equivalent of "litres per 100 kilometres" for electrified vehicles.

## **wltp**

Worldwide harmonised Light vehicles Test Procedure. This protocol defines the exact conditions under which vehicle tests are carried out, irrespective of the manufacturer, making it possible to share and compare information that is important to consumers and legislators, such as fuel or electricity consumption, the range of electric or rechargeable hybrid vehicles, and pollutant emissions that are much closer to everyday use.

## **V2L**

Abbreviation for "vehicle-to-load", i.e. "from vehicle to electrical devices". This is a technology that makes it possible to use part of the electricity stored in the vehicle's battery to power an electrical appliance in the home, such as a barbecue or vacuum cleaner for example.

## **V2G**

Abbreviation for "vehicle-to-grid", i.e. "from the vehicle to the electricity grid". This technology allows a vehicle to be recharged bi-directionally: the car recharges when electricity demand is low and returns the energy from its battery to the electricity grid when demand increases.

# services to make your life easier in electric vehicles

**Enjoy a completely practical and efficient electric experience: installation of a charging point in your home as soon as you purchase the vehicle, support services delivered via your mobile, card for accessing and paying for the use of European charging points.**

## **home charging station**

Installation of home charging solutions.

## **charge pass charging card**

Easier payment and location of charging points.

**discover charging solutions**

# Renault care service

**We are always at your side to make the driving experience easier and save you time with the maintenance of your Renault: online quotes and appointments, fixed-price packages, maintenance contracts, insurance and assistance, personalised my rnl programme... Take advantage of our simple and fast solutions tailored to your needs.**

**Thanks to the connected maintenance service, you will be notified when the scheduled maintenance of your vehicle is due and proactively alerted when it requires a workshop visit.**

**You can also view the health of your vehicle in real time in your my rnl space. Renault has also developed systems for predicting the wear of parts. This way, the customer is kept informed of the condition of their vehicle's brakes or battery, and is prompted to replace them if necessary.**
